154

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, particularly along the edges. A dark, possibly black, binding edge is visible on the left side of the page. The overall tone is a warm, off-white or light beige.

1. *Chlorophyll a* (Chl a) and *Chlorophyll b* (Chl b) are the two main pigments in the photosynthetic apparatus of green plants. They are responsible for the absorption of light energy and the conversion of carbon dioxide and water into glucose and oxygen.

Fig. 2. $\Delta G_{\text{cal}}^{\circ}$ of the reaction of the H_2 and CO_2 with the H_2O and CO at the $T = 298.15$ K and $P = 1$ bar. The $\Delta G_{\text{cal}}^{\circ}$ is calculated from the $\Delta G_{\text{f}}^{\circ}$ of the H_2 , CO_2 , H_2O , and CO at the $T = 298.15$ K and $P = 1$ bar.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. The left edge of the page shows the binding structure, including what appears to be stitching or staples. There is no text or other markings on the page.

52

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and dark smudges, particularly along the left edge, which may be due to the binding or handling over time. The right edge of the page is slightly irregular.
